

Switches for the  
**MEDICAL &  
DENTAL  
MARKETS**

E-Switch provides a robust line of switch products, from pushbuttons and tact switches, to rockers and toggles. Each switch family provides multiple features suitable for medical-related devices and equipment. Whether the application requires moisture-resistance, illumination, or an anodized finish, E-Switch is sure to have a switch meeting the necessary design specifications.

## ANTI-VANDAL SWITCHES

E-Switch offers a wide range of anti-vandal switches suitable for the medical field. The switch series features long operating life in either momentary or latching functionality; IP certified; the option of dot, ring, or power symbol illumination in many LED colors; cutout panel size ranges from 12mm to 28mm; and SPDT or DPDT option.

**Most requested anti-vandal switches are shown; visit [e-switch.com](http://e-switch.com) to see full line in anti-vandal series.**

Emergency Transport Equipment

## ROCKER SWITCHES

Rocker switches provide a firm back and forth motion upon actuation of the switch, which makes them frequently requested as an on/off power switch on medical devices.

Rockers are commonly used to directly power a device. They are available in many shapes, sizes and colors, with both standard and custom symbols available on the actuator. Rocker switch illumination may be controlled on a separate circuit, or be dependent on switch position, based on what series is chosen. Available termination options include SMT, PCB pins, solder lugs, screw terminals, and quick connect tabs.

## PUSHBUTTON SWITCHES

Pushbutton switches are available in many shapes, sizes and illumination options. Several pushbuttons have cap options. The illuminated pushbuttons are popular on medical related equipment as a visual power source indicator. Pushbuttons offer the following termination options: SMT, PCB pins, solder lugs, screw terminals, and quick connect tabs.

## TACTILE SWITCHES

Tactile switches come in many shapes, sizes and illumination options. They come in surface mount, right angle SMT, and thru-hole termination options. Tact switches are particularly suitable for a wide range of medical equipment and devices because of their tactile response. The illuminated tact switches are popular on medical related equipment as a visual power source indicator.

## SNAP ACTION & TOGGLE SWITCHES

Snap Action switches provide long operating life and numerous operating force options, which makes them suitable for repetitive use situations.

Toggle switches offer a variety of switching functions and bushing options to fit many equipment requirements.

A product designer for medical devices and medical-related equipment can utilize a myriad of electro-mechanical switches based on desired features. E-Switch offers the breadth and depth of switches to satisfy the requirements.
